To Whom It May Concern:

I am writing this reference letter at the request of Mr. Jongkuk Lee; a former student of mine at Seneca College in the Computer Programmer (CPD) program. I had the pleasure of teaching Jongkuk "Introduction to Java for C++ programming" course.

Jongkuk receiving a grade of "A" in the course speaks for itself as of an excellent performance in the course. He has proven outstanding abilities of working and understanding of the Object Oriented Concepts in Java, by quickly gripping on advance topics in java, including: File handling, Functional programming and Lambda Expressions, Parallel programming and multithreading, Networking, Socket Programming, Multi Client/ Server paradigm, Java RMI programming concepts. Beside these he also proved his work in a professional manner, meeting the deadlines, producing secure and safe code and meeting the code standards.

Jongkuk was a model student. He was always present in every lecture and lab period and would take it upon himself to go beyond the course materials to gain a deeper understanding of the topics presented. He is extremely intelligent and is always looking to upgrade his knowledge of java programming.

I can confidently say that Jongkuk would be an asset to any development team. His extensive experience and professionalism paired with his ability to learn new topics quickly make him an ideal candidate as a Java developer. If you have any further questions, I can be reached at (647) 542-2084.

Sincerely,

A handwritten signature in black ink, appearing to read 'Mahboob Ali', with a stylized flourish at the end.

Mahboob Ali,
Professor – School of Information & Communication Technology
Seneca College of Applied Arts & Technology
70 The Pond Road. Toronto, Ontario M3J 3M6
